CERTIFICATE OF AMENDMENT OF ARTICLES OF INCORPORATION OF TELLURIDE MINING, MILLING AND DEVELOPMENT COMPANY.

KNOW ALL MEN BY THESE PRESENTS:

That we, GEO. W. LONG and J. L. McIVER, both of Outman, Mohave County, Arizona, the President and Secretary, respectively, of TELLURIDE MINING, MILLING AND DEVELOPMENT COMPANY, a corporation duly organized and existing under and by virtue of the laws of Arizona, do hereby certify that at a special meeting of the stockholders of said company, duly held at the offices of said company in the United Eastern Mining Company office building at Outman, Arizona, on the 25th day of March, 1916, at 10 o'clock A. M. upon at least thirty days' notice in writing given to each stockholder of said Telluride Mining, Milling and Development Company of the proposed decrease of the capital stock thereof and the proposed amendment of the articles of incorporation thereof, hereinafter fully described, a resolution providing for a decrease of the capital stock of said Telluride Mining, Milling and Development Company by reducing the par value of the shares, and for an amendment of the articles of incorporation thereof, was duly adopted by the affirmative vote of 437,835 shares of the capital stock out of 565,241 1-3 shares then issued and outstanding. Said resolution is as follows:

RESOLVED, That the articles of incorporation of this company be amended by changing Articles IV and VIII thereof so as to read as follows:

ARTICLE IV.

The amount of the capital stock of this corporation shall be \$229,000.00, divided into 1,145,000 shares of the par value of twenty cents each. The capital stock shall be issued as provided by the board of directors, and may be issued in exchange for money, property, services or rights of any nature whatsoever, and the judgment of the board of directors as to the value of such property, services and rights shall be conclusive.

ARTICLE VIII.

The highest amount of indebtedness or liability, direct or contingent, to which this corporation may at any time subject itself, shall be the sum of One Hundred and Forty-five Thousand Dollars.

RESOLVED FURTHER, That the President and Secretary of this company be and they are hereby authorized and directed to cause a certificate setting forth the amendments herein provided for to be signed and acknowledged by the President of this company and attested by the Secretary thereof, and to take any and all steps necessary to carry out the purposes of this resolution.

IN WITNESS WHEREOF, we, the President and Secretary, respectively, of said Telluride Mining, Milling and Development Company, have hereunto set our hands and seals, and have hereto affixed the seal of said company, this 15th day of April, 1916.

(Signed) Geo. W. Long (SEAL)

President Telluride Mining, Milling and Development Company.

ATTEST:

(Signed) J. L. McIVER

Secretary.

STATE OF ARIZONA

County of Mohave.

This instrument was acknowledged before me this 15th day of April, 1916, by GEO. W. LONG and J. L. McIVER, as the President and Secretary, respectively, of Telluride Mining, Milling and Development Company, a corporation.

My commission as Notary Public expires December, 31st, 1916.

(Signed) H. Y. Basham.

(Notarial Seal)

Notary Public in and for Mohave County, State of Arizona.

FOREST FIRES IN MEXICO

[Republican A. P. Leased Wire]
DEL RIO, Texas, June 6.—Forest fires are raging in the Santa Rosa mountains in Mexico, 70 miles west of here, presumably a result of recent dry weather and high temperatures. An area of 40 square miles has been burned. The entire Del Rio section is covered by a dense smoke. The maximum temperature here today was 109 degrees, the highest in five years.

ARIZONA TO PRODUCE 710,995,853 POUNDS DURING CURRENT YEAR

710,995,853.

Not in round numbers, but in actual totals of the estimates of every copper mining company in Arizona, the above figure represents the amount of copper this state will produce during the year 1916.

Translated into dollars, in which form the stupendous total may be more readily understood, this represents a gross income for the twelve-month of TWO HUNDRED MILLIONS OF DOLLARS.

710,995,853 represents in pounds the production of the leading mines—all of them. It is a conservative estimate, compiled by the big boss of one of the three big copper mines in the state. The only thing it doesn't take into account is the possible production of comparatively small quantities of ore from new or recently opened workings.

For Copper Alone
Justifying Arizona's claim to the leading position among the copper mining states, the estimate will echo through financial circles, where the information it contains will be received with deep interest.

And the figure is for copper only. In addition, Arizona produces millions of dollars' worth of gold, silver, lead, zinc, tungsten and many other metals.

OATMAN-OPTIMISM MEANING THE SAME

With the Big Jim, United Eastern and Gold Ore mines developing ore of unusually high value for the Outman district, with the Carter seemingly just entering its vein on the 350-foot level, with the Fessenden, Ivanhoe and United Western expected to strike their veins at any time on the 500-foot level, and with the Boundary Cone drifting in its main vein on the new 750-foot level, optimism has reached an unprecedented stage in this district, says the Journal Miner.

BISBEE-AJO ENTERS NEW COPPER FIELD

The Bisbee-Ajo Copper Development Company is capitalized at \$650,000, the shares having a par value of \$1 each. Of this stock \$500,000 has been pooled for the promoters and 100,000 shares, it is understood, have been put on the market at 25 cents.

Ed. Sweeney is president John Perry vice president, and C. A. Johnson secretary-treasurer.

COPPER CONCERNS PAY DIVIDENDS

[Republican A. P. Leased Wire]
NEW YORK, June 6.—Utah copper company directors today declared a regular quarterly dividend of \$1.50 and an extra dividend of \$1.25, against the previous extra disbursement of \$1.

Nevada Consolidated company directors declared a regular quarterly dividend of 7½ cents and an extra of the same amount against the previous extra disbursement of 12½ cents.

Chino Copper company directors today declared the regular quarterly dividend of \$1.25 and an extra dividend of \$1.

Kennecott copper company directors today increased the rate of dividends from \$4 to \$6 per share by declaring a quarterly dividend of \$1.50.

GOLD ORE SHIPPING SPECTACULAR ORES

The Gold Ore at Outman is steadily sending 25 to 30 tons of ore per day to the Gold Road mill, and the extraction is averaging about \$20 per ton. Some ore of spectacular value is being developed, but none of this is being extracted at this time, except where it is necessary to extract it to do proper development work.

President Warden states that something like 75,000 tons of ore are already blocked out in the property above the 520 foot level; that the shaft will soon be sunk another 100 feet and lateral work started on the new level, and that the erection of a 20-ton mill is contemplated for the very near future.

Aside from these notable developments, more than 100 companies are steadily driving shafts downward, their objective points being anywhere from 200 to 600 feet depth. A number of companies have started lateral work at depths ranging from 300 to 400 feet, but these laterals are as a rule mainly exploratory to enable the operators to keep in close touch with the character of the formation.

proposed to do extensive development work is located in the Sonora range of mountains, 22 miles south of Cornelia.

The property includes 24 unpatented claims known as the September Morn group. The ground was located in September, two years ago, by Paddy Finn and Walter Holm, both of Bisbee, and sold to the company when the latter was organized.

At that time the two miners brought some wonderful looking rock into Bisbee. It predominated in glance and bomite.

The group includes a hill of schist and monzonite, which is impregnated with copper sulphides, chalcocite, bornite and chalcophyllite. At places on the ground high grade copper ore outcrops, which gives every indication of large bodies of concentrating sulphide ore.

The Bisbee-Ajo Copper Development company is capitalized at \$650,000, the shares having a par value of \$1 each. Of this stock \$500,000 has been pooled for the promoters and 100,000 shares, it is understood, have been put on the market at 25 cents.

Ed. Sweeney is president John Perry vice president, and C. A. Johnson secretary-treasurer.

The section where this company entered a few months ago, is isolated, and for miles in any direction has never been reached, the country being unobtainably rated for lack of water.

Other mining men, however, are now coming in, and new locations are being made.

The reversal of the later session was concurrent with an advance in call money to four per cent, the highest quotation in eighteen months. Local banks recently expressed their disapproval of the movement in certain of the more volatile issues and the hardening of loan rates may not be without its significance in that quarter.

Motor stocks were less active and more irregular than yesterday. Willys-Overland made an extreme recovery of 8 points to 212.

Sugars repeated their familiar performance of mounting to higher levels, South Porto Rico common and preferred touching 236 and 129, respectively, with 8½ for American beet. Some of the better known war issues, like crucible steel and Baldwin Locomotive, had their narrow flights and Bethlehem steel gained six points, but United States Steel lagged in characteristic fashion, duplicating heaviness at the close. Coppers were only mildly responsive to higher dividends. Norfolk and Western fastened its claim to leadership of the rails on a further advance of 2½ to the new high price of 136½.

Total shares of stocks amounted to 625,000 shares.

Marine 4½ imparted firmness to the general bond list on their advance to the new high quotation of

GUGGENHEIMS IN AJO FIELD

The Guggenheims (the American Smelting & Refining Co.) have entered the Ajo field, taking a two-year bond and lease on the Copper Mountain group of mining claims situated about 15 miles south, says the Ajo Copper News.

Diamond drilling, will it is said, be commenced immediately.

All operations will be tributary to Ajo, the claims taken over being in this mining district and this camp being the postoffice and nearest trading point.

There are to be four equal payments of 25 per cent, the first falling due in six months, the second in one year, the third in a year and a half, and the final payment in two years. The selling price is given as over \$100,000.

The owners are M. E. Gibson, Jr., and W. A. Knox, both of Ajo. Here there are many workings, including the work through Julius Kruttschnitt of Tucson, the S. P. man, who is agent for the Guggenheims in this portion of the Southwest. He visited the property accompanied by B. B. Ellis of the Longyear Co., diamond drillers.

The Copper Mountain group consists of 16 claims. The formations are similar to those at the New Cornelia and at the Ajo Consolidated, probably monzonite and rhyolite. A massive dyke 150 feet wide extends for a distance of a quarter of a mile. Here there are many workings, including tunnels, shafts, etc. The deepest shaft is down 60 feet. There are four shafts of from 40 to 60 feet, and any number 16 to 20 feet. A tunnel 40 feet long connects with one of the shafts.

The entire dyke is in ore (copper sulphides) said to average 6 per cent.

Considerable ore was shipped in the early days.

C. D. Rogers, who is with a close association, which has recently entered Pike's Peak district, on the boundary line of Yavapai and Maricopa counties, operating two groups of mines, stated returns from the first shipment to El Paso, gave values of \$46 per ton, in silver, lead and copper. He said: "This product represents only stripping the formation in location work, but in the future we propose to go ahead with practical development, funds for which are ready," says the Journal Miner.

"Our operations to date have been attended with little publicity that title might be clearly established. We have two groups, of 16 claims each, one carrying principal values in gold, assaying \$16.25 to the ton, and the other a 6 per cent copper content. No further shipments are to go out for the present, actual development having been outlined to be energetically carried out."

The section where this company entered a few months ago, is isolated, and for miles in any direction has never been reached, the country being unobtainably rated for lack of water.

Other mining men, however, are now coming in, and new locations are being made.

The reversal of the later session was concurrent with an advance in call money to four per cent, the highest quotation in eighteen months. Local banks recently expressed their disapproval of the movement in certain of the more volatile issues and the hardening of loan rates may not be without its significance in that quarter.

Motor stocks were less active and more irregular than yesterday. Willys-Overland made an extreme recovery of 8 points to 212.

Sugars repeated their familiar performance of mounting to higher levels, South Porto Rico common and preferred touching 236 and 129, respectively, with 8½ for American beet. Some of the better known war issues, like crucible steel and Baldwin Locomotive, had their narrow flights and Bethlehem steel gained six points, but United States Steel lagged in characteristic fashion, duplicating heaviness at the close. Coppers were only mildly responsive to higher dividends. Norfolk and Western fastened its claim to leadership of the rails on a further advance of 2½ to the new high price of 136½.

Total shares of stocks amounted to 625,000 shares.

Marine 4½ imparted firmness to the general bond list on their advance to the new high quotation of

104½. Total sales of bonds par value were \$2,700,000.

United States registered bonds advanced ¼; coupons 4½ and Panama 3 ½ per cent on call.

CHICAGO GRAIN
CHICAGO, June 6.—Wheat prices rose to a material extent today, chiefly as a result of foreign buying of futures here and because of bullish advices about domestic crop conditions. The market closed strong 2 to 2½¢ cents net higher, with July at \$1.05½ and September at \$1.07½. Corn gained 1 to 1½¢, and oats ¾¢ to 1¢. In provisions the outcome was a setback of 2½¢ to 3½¢.

Opinions varied greatly as to the cause of the European purchase of wheat futures here. Theories that the disaster to Lord Kitchener had some bearing on the subject were not backed up by any substantial evidence.

The market at no time except during a brief period of uncertainty at the outset showed the least symptom of a decline.

Unfavorable weather was chiefly responsible for the strength of corn. Oats were helped upward by a better call from the seaboard.

Lower prices on hogs weakened provisions. A break in the Liverpool market was also a bearish factor.

Close: Wheat—July, \$1.05½; Sept., \$1.07½.

Corn—July, 70½; Sept., 69½.

Oats—July, 40; Sept., 38½.

Pork—July, \$20.62; Sept., \$20.45.

Lard—July, \$12.25; Sept., \$12.37.

Ribs—July, \$12.25; Sept., \$12.32.

LIVESTOCK

FINANCES AND MARKETS

[Republican A. P. Leased Wire]

NEW YORK, June 6. (Wall Street)

Special stocks as well as representative issues were elevated again today on an expansion of professional activity. The markets course was altogether inconsistent, however, in that it ignored the disaster to the British military administration at the outset but declined later on the favorable auguries conveyed in a number of increased dividends.

The reversal of the later session was concurrent with an advance in call money to four per cent, the highest quotation in eighteen months. Local banks recently expressed their disapproval of the movement in certain of the more volatile issues and the hardening of loan rates may not be without its significance in that quarter.

Motor stocks were less active and more irregular than yesterday. Willys-Overland made an extreme recovery of 8 points to 212.

Sugars repeated their familiar performance of mounting to higher levels, South Porto Rico common and preferred touching 236 and 129, respectively, with 8½ for American beet. Some of the better known war issues, like crucible steel and Baldwin Locomotive, had their narrow flights and Bethlehem steel gained six points, but United States Steel lagged in characteristic fashion, duplicating heaviness at the close. Coppers were only mildly responsive to higher dividends. Norfolk and Western fastened its claim to leadership of the rails on a further advance of 2½ to the new high price of 136½.

Total shares of stocks amounted to 625,000 shares.

Marine 4½ imparted firmness to the general bond list on their advance to the new high quotation of

104½. Total sales of bonds par value were \$2,700,000.

United States registered bonds advanced ¼; coupons 4½ and Panama 3 ½ per cent on call.

CHICAGO GRAIN
CHICAGO, June 6.—Wheat prices rose to a material extent today, chiefly as a result of foreign buying of futures here and because of bullish advices about domestic crop conditions. The market closed strong 2 to 2½¢ cents net higher, with July at \$1.05½ and September at \$1.07½. Corn gained 1 to 1½¢, and oats ¾¢ to 1¢. In provisions the outcome was a setback of 2½¢ to 3½¢.

Opinions varied greatly as to the cause of the European purchase of wheat futures here. Theories that the disaster to Lord Kitchener had some bearing on the subject were not backed up by any substantial evidence.

The market at no time except during a brief period of uncertainty at the outset showed the least symptom of a decline.

Unfavorable weather was chiefly responsible for the strength of corn. Oats were helped upward by a better call from the seaboard.

Lower prices on hogs weakened provisions. A break in the Liverpool market was also a bearish factor.
